AFP-GAI

AFP-GAI Course 1 · Operational staff & analysts

Leveraging GenAI in Your Cyber Job

AFP-GAI is a short, highly practical and immediately applicable programme for cybersecurity professionals who want to bring generative AI tools into their day-to-day work, without being data scientists. Two intensive courses, independent and combinable, each focused on a concrete use: one for operational staff and analysts, the other for managers and decision-makers. Exclusively hands-on, with live access to the tools during the training. A certification is awarded at the end of each course.
